

We are a leading manufacturer of timber fire surrounds with an established reputation for quality and excellence. Based in the heart of Yorkshire, our modern factory blends the latest technology with the age old experience of quality British craftsmanship to create the most versatile and varied ranges of wooden mantelpieces available today.

Member Number: A123679

UK Craftsmanship

Established now for nearly 20 years, we stay ahead of the market by introducing stylish and original designs manufactured in Yorkshire using only the most reliable and majestic woods sourced from around the world. The beauty of our natural timbers ensures that each mantel bears distinctive hallmarks bestowing its own unique character and identity. Our collection offers over 60 mantel pieces with a full range of designs from classic to contemporary to the distinctively ultramodern. So let GB Mantels help you to create that warm welcoming fireplace you've always wanted, then sit back and relax safe in the knowledge that your fireplace has been crafted from the finest natural materials and treated with absolute tender loving care.

Made to Measure Service

Every fire surround that we produce is individually handmade by skilled craftsmen at our factory in Yorkshire. Mantels are not mass produced and we do not buy or supply foreign imports. Therefore, to ensure that your every fireplace need is catered for, we offer a full "made to measure" service. Not only can you choose the exact size of your fire surround, but you can also choose from our range of 27 wood finishes to create a truly individual fireplace to suit your home. Any of our Approved Retailers will be happy to advise you of details and costs.

We Care

GB Mantels are committed to protecting the environment in which we all live. Our policy is to continually improve our environmental performance by preventing pollution, and where possible exceeding the applicable environmental guidelines. We fully comply with all relevant European legislations and commit to saving energy and recycling our waste to offset our carbon footprint and safeguard the planet for future generations.

Protecting the Planet

All of the natural woods that we use are sourced from well managed professional plantations that are approved by the FSC (Forest Stewardship Council) or the PEFC (Programme for the Endorsement of Forest Certification). These non-profit making associations independently inspect and evaluate forests of origin to ensure full forest replenishment schemes are adhered to, ensuring that you can purchase a mantel from us with the confidence that you are not contributing to the destruction of the world's forests.

Oak Collection

Known as the king of woods due to its unique character and strength, our oak is well seasoned and easily identifiable by its stunning natural grains and distinctive persona. The illustrated mantels can either be made from complete Solid Prime Oak **S** or Grade A Oak Veneer **V**. Either way such is the individuality of natural oak that no two surrounds will ever be identical. The oak colour options are illustrated on page 50 and to portray an up to the minute style and an in fashion look, most of these mantels are also available in a smooth ungrained Pastel Finish **P**. Fully fitted LED or Halogen downlights are available on all our mantels and incorporate a subtly placed undershelf switch which are illustrated on page 49.

Cosmopolitan Collection

The Cosmopolitan Collection brings a truly fresh concept to the wooden fire surround market. Clean and neutral, these surrounds are available in a choice of the majestic Solid Prime Oak  or Grade A Oak Veneer . Each mantel has a choice of a main colour with a subtle inlay option of your choice. Why not try the ever popular Clear Oak with chic American Walnut, the innovative Olive with a bold Matt Oak contrast or the striking Slate with Mist inlay, the colour variations are almost endless. To complete the modern style, fully fitted LED or Halogen downlights are available on all our mantels and incorporate a subtly placed undershelf switch which are illustrated on page 49.

Sovereign Collection

The Sovereign Collection encompasses designs for all situations. Traditional or modern, reserved or audacious, the surrounds are manufactured from high quality Kronospan and Medite Premier boards, and then painted to a smooth finish. Our Sovereign mantels are available in chic pastel finishes  and are ideally suited to the fireplace industry due to their density and stability. These surrounds are perfectly apt for all gas and solid fuel fire installations. Fully fitted LED or Halogen downlights are available on all our mantels and incorporate a subtly placed undershelf switch which are illustrated on page 49.

Electric Collection

Manufactured from the finest crown cut veneers, our electric suites have been designed with simplicity and functionality in mind. The suites comprise of mantel, back panel and hearth, fitted Halogen downlights and a fixed 3" rebate to allow easy installation of any slimline electric fire of your preference. To cater for all tastes, the suites are available in any Oak Veneer **V** or Pastel Finishes **P** that are on page 50. But the choice doesn't stop there, the flexibility of these suites allows you to choose the material and colour of the mantel, back panel and hearth. Either choose one colour throughout the whole suite or why not select the mantel in one colour and contrast it with an alternative back and hearth? Most suites are shown with our very own Resolution Electric Fire which is also presented on page 47.

Resolution Electric Fire

Our Electric Suite range allows the use of any electric fire. However, once you have chosen your suite, why not complete the fireplace with our very own Resolution electric fire. The Resolution boasts a dynamic LED flame effect and is slim enough to allow a flat wall installation, so you can fit it anywhere. This new LED technology gives a real iridescent glow that you will find hard to rival. Available in 3 colour options as highlighted, the fire is completed with a modern triple layered one piece robust magnetic trim and matching Grace fret front. Once switched on, the warmth is instant with 2 heat settings and the fire can also be set to flame effect only for those warm summer evenings when you just want to admire the smouldering flame picture. The fire is completed with both coals and pebbles so you can choose your favourite or even rotate them at your desire giving you complete versatility and a style to match any room.

All of our Electric Suites are supplied as standard with fully fitted halogen downlights and a fixed 3" rebate. They can be supplied with or without the illustrated Resolution Electric Fire.

Lighting

Halogen Lights

Slimline LED's

Deluxe LED's

Downlights can completely transform the appearance of a fireplace. The soft warm glow of the lights completes the focal point in your room. All of our surrounds are available with the option of fully fitted downlights complete with plug and subtly placed switch. We offer 3 choices of downlights, which are shown in the adjacent images.

Halogen lights are low voltage with two 24v GU4 light bulbs encased in a chic chrome holder and are easily accessible should you need to change them.

LED Lights (Light-Emitting Diodes) are energy efficient and will last longer than a normal light bulb. Our Slimline LED lights are supplied with three bulbs which are 15mm in diameter and fit without a chrome holder to give more flexibility should rebate depth be an issue. Our Deluxe LED lights are also supplied with three bulbs, however, each one is encased in a stylishly attractive chrome holder.

Important Mantel Information

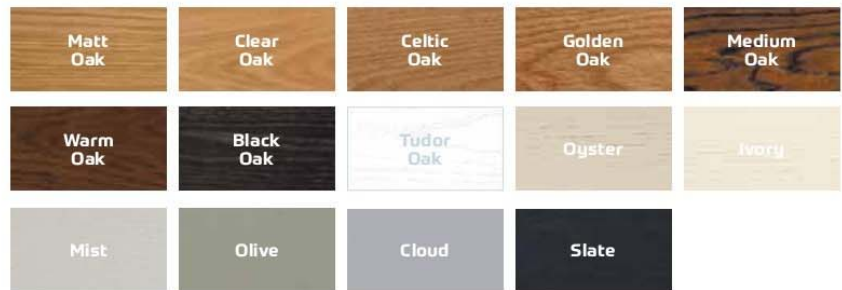

- Under no circumstances should Oak Veneer mantels be installed with High Efficiency (HE) or Balanced Flue (BF) Gas Fires.
- When fitting surrounds with solid fuel applications, only Solid Oak or Pastel surrounds should be used and HETAS approved clearances must be adhered to.
- All standard fire surrounds will accommodate a 37" x 37" back panel.
- Our measurement "D" is quoted to the corner of the opening as shown in the technical diagram.
- All of our downlights are provided with 1.5m of cable and a 5 Amp plug. Removal of this plug will invalidate your warranty and may overload the transformer, causing the lights to fuse.

Colour Guide

S

Solid Oak

Mantels made from complete Solid Prime Oak and stained or painted to a finish. Suitable for all applications but please note that wood is a combustible material and when used with solid fuel applications, protective measures should be undertaken.

V

Oak Veneer

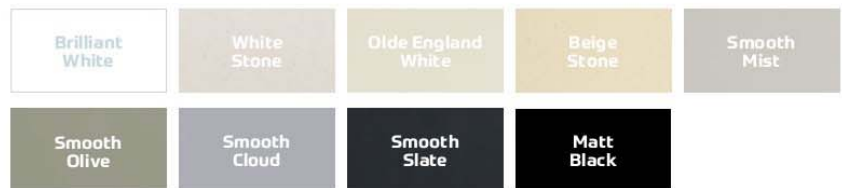

Natural Grade A Oak Veneer stained or painted to a finish. These mantels are laminated and as so are not suitable for Solid Fuel, High Efficiency or Balanced Flue applications.

P

Pastel Colour

Manufactured from Kronospan and Medite Premier boards and painted to a smooth finish without a wood grain.

H

Hardwood Veneer

Suitable for all applications as the veneers are polished rather than laminated and then stained to a finish.

Please Note - Important Information

Your fireplace should reach you in perfect condition. However, we wish to advise you to inspect the surround for any damages before installation as we do not accept any liabilities for defects once it has been fitted or fixing brackets have been attached. Due to the inherent qualities of natural materials, it is common for surrounds to encompass characteristics such as knots, blemishes, medullary rays, pith flecks and small flower splits. These natural occurrences are not faults in the product, but are features found in solid wood and only enhance the beauty of the product. Our policy is not to restock or exchange any product where the complaint is a natural occurrence in the wood.

Due to the nature of natural wood, it is common for surrounds to vary in colour because of timber shading and wood grains. With this in mind, both solid and veneered woods are subject to fluctuation in colouring. Colour and shade reproduction are as accurate as the printing process will allow and can vary due to photographic lighting. This colour guide is only provided to

assist you in your selection and actual samples can be viewed at your local retail outlet. Measurements given are based as a guide only and may vary. GB Mantels Ltd reserves the right to change any materials or specifications without prior notification.

Veneered products are not suitable for installation with solid fuel or high efficiency gas fire appliances. If fitted in this situation, the mantel may de-laminate due to extreme temperatures. These applications require solid wood or Pastel mantels and full advice on this can be given by your local retailer.

Solid wood surrounds may incorporate a small percentage of veneer as a strengthening agent which may be housed behind the surround as a means of support. All of our surrounds are handmade by skilled craftsman and therefore measurements found on page 47 to 48 of this brochure are to act as a guide only and may vary slightly.
